How to Use International Data Bases on IP

This project is funded by
the European Union

PUBLIC INFORMATION ABOUT INTERNATIONAL APPLICATIONS AND REGISTRATIONS AND REGISTERED TRADEMARKS WORLDWIDE

- Available sources of information:
- **WIPO Gazette of International Marks**
- **Madrid Monitor**
- **Extracts from the International Register**
- **Global Brand Database**

This project is funded by
the European Union

WIPO Gazette of International Marks

- It is published every week on the Madrid System website.
- The Gazette contains all relevant data on new international registrations, renewals, subsequent designations and changes as well as other entries affecting international registrations.
- The bibliographic data is identified by the WIPO INID (“Internationally agreed Numbers for the Identification of Data”) codes, that is, the codes of Standard ST.60 (“Recommendation concerning bibliographic data relating to marks”) and Standard ST.3 (“Recommended standard two-letter code for the representation of States, other entities and international organizations issuing or registering industrial property titles”).
- The various codes used in the Gazette and the bibliographic data to which they relate are given in each issue of the Gazette.

This project is funded by
the European Union

WIPO Gazette of International Marks

- The Gazette also contains information of general interest
 - declarations and notifications made by Contracting Parties under the Protocol or the Regulations regarding particular requirements,
 - the amounts of individual fees under Article 8(7) of the Protocol
 - information on the days on which the International Bureau is not scheduled to be open to the public.
 - The Gazette can be accessed by Madrid Monitor (<https://www3.wipo.int/madrid/monitor/en/>).

This project is funded by the European Union

Your gateway to the Madrid System, keeping you up to date on your trademark. Follow the status of your international application or trademark registration, access detailed information on all trademarks registered through the Madrid System, and keep an eye on competitors' trademarks

COVID-19 UPDATE: We urge users who have not already done so to [provide an e-mail address via Contact Madrid](#) to receive electronic communications under the Madrid System. [Find out why this is necessary.](#)

NEW: Identify registrations with missing email addresses with our new [email address status filter](#).

Search WIPO Gazette Support

The WIPO Gazette of International Marks is the official publication of the Madrid System. Every week the International Bureau publishes data regarding new international registrations, renewals, subsequent designations and modifications affecting existing international registrations.

GAZETTE RESOURCES

- INID codes (ST 60) PDF
- Country codes (ST3) PDF
- Madrid Gazette Archive (1997-2010)
- Madrid System information notices

This project is funded by
the European Union

Madrid Monitor

- Madrid Monitor is a powerful search tool for trademark attorneys and agents.
- One can find in the database of the Madrid Monitor anything about the status of all international registrations in force, including data relating to international applications and subsequent designations under examination by the International Bureau.
- The database contains the bibliographic data of all international registrations in force and the images of marks registered, which consist of or contain special characters or figurative elements.
- Madrid Monitor is updated daily and is available to the public, free of charge on the Internet at
- <https://www3.wipo.int/madrid/monitor/en/>.

This project is funded by
the European Union

Madrid Monitor

- The International Bureau improves continuously the scope of the information available to users of Madrid Monitor.
- In addition, digitized copies of statements of grant of protection, notifications of provisional refusal, final decisions (statements of confirmation of total refusal or statements of grant of protection following a provisional refusal), further decisions or invalidations are accessible directly by users of Madrid Monitor database in PDF format under the corresponding heading and INID code.

This project is funded by the European Union

Extracts from the International Register

- On payment of the fee prescribed in the Schedule of Fees, anyone may obtain from the International Bureau the following certified documents concerning the contents of international registrations (either in force or expired):
- The **detailed extract** is an analysis of the situation of an international registration. It consists of a certified copy of the international registration as originally published in the Gazette, with, as the case may be, details of any subsequent change, refusal, invalidation, statement of grant of protection, correction or renewal recorded in the International Register at the time the extract is prepared.
- The detailed extract is only available in the original language of the application for international registration. However, the cover page of the detailed extract can be requested in English, French, Spanish, Arabic, Chinese or Russian.

This project is funded by
the European Union

Extracts from the International Register

- A **simple certified extract** consists of certified copies of all entries that have been published in the Gazette with regard to a given international registration, together with, as the case may be, any notification of refusal of protection, invalidation or statement of grant of protection received at the time the extract is prepared.
- The simple certified extract is available only in the original language of the international registration. However, the cover page of the simple extract can be requested in English, French, Spanish, Arabic, Chinese or Russian.

This project is funded by
the European Union

Extracts from the International Register

- **An attestation** certifies specific information on the current status of an international registration and/or application.
- **A copy of a certificate (registration or renewal)** consists of a certified copy of a certificate of registration or renewal. It can only be requested by the holder or recorded representative.
- A request for an extract should indicate the number and date of the international registration with respect to which an extract is requested and the type of extract requested. The establishment of an extract may be expedited, upon request and on payment of a fee.

This project is funded by
the European Union

Global Brand Database

- If a trademark conflicts with the rights of another person or business, it would be impossible to use or register it. Before filing a local or international trademark application, it is important to search for existing trademarks in the target markets, in which protection is to be sought.
- The Global Brand Database is the gateway to more than 46,350,000 records from some 55 national and international collections, and the first step in researching whether an identical or similar trademark to the one of the potential applicant is already protected in the target markets.

This project is funded by
the European Union

Global Brand Database

- The Global Brand Database is a simple yet powerful tool with the following features and benefits:
- 14 data-field search options, including image search
- Easy to search U.S. or Vienna image classes by description, and browse by Nice Classification indication number
- Automatic search suggestions
- Downloadable search results and records
- WIPO offers free online seminars (webinars) to deliver information, training and updates on the [Global Brand Database](#).

Annual, Monthly and “In Progress” Statistics

This project is funded by
the European Union

The International Application Simulator

- The International Application Simulator is a tool to use in order to find out if a potential applicant is eligible to use the Madrid System and check whether protection in target markets can be obtained. At the end of the simulation, it would also be possible to estimate the application costs.

The Madrid Application Assistant

- The Madrid Application Assistant is an electronic version of the official MM2 form that applicants may use to file an international application under the Madrid System.
- This new tool is available to applicants where the Office of origin does not offer the services of Madrid e-Filing or its own online filing solutions.
- The Madrid Application Assistant records all the information required to complete an international application in an intuitive and linear manner.

This project is funded by
the European Union

The Madrid Application Assistant

- Once completed, the international application will be made available in a PDF format ready for the applicant to submit to the Office of origin for certification.
- Information required to fill out the international application may be imported directly from the Office of origin's national/regional trademarks database.
- This not only saves time and effort, but also reduces the risk of irregularities, thus making the process of filing an international application more efficient and accurate.

This project is funded by
the European Union

The Madrid Application Assistant

- When using the Madrid Application Assistant, the applicant can check the list of goods and services, and have this translated automatically, by using the integrated Madrid Good and Services Manager.
- The fees may be paid by using a current account opened with WIPO
(https://www.wipo.int/finance/en/current_account/index.html), by bank transfer or by credit card.
- The Madrid Application Assistant is available to the public, free of charge, at <https://www.wipo.int/madrid/application-assistant/>.

This project is funded by
the European Union

Madrid Goods and Services Manager

- Online tool that provides access to a database of goods and services. It assists trademark applicants in compiling the list of goods and services that must be submitted when filing an international application.
- The MGS provides terms from the alphabetical list of the International Classification of Goods and Services for the Purposes of the Registration of Marks (Nice Classification) as well as a much wider choice of terms that are pre-accepted by the International Bureau and many Intellectual Property Offices in the Madrid System. Using such pre-accepted terms enables applicants to avoid irregularity letters from the International Bureau.

This project is funded by
the European Union

Madrid Goods and Services Manager

- The pre-accepted terms of goods and services are provided in the three languages of the Madrid System as well as in many other languages. The MGS enables users to obtain an instant translation of a list of goods and services from any of those languages into any other one available on the MGS.
- It also features a function enabling users to check whether the terms of a list of goods and services that are pre-accepted by the International Bureau will be accepted or not by some Contracting Parties of the Madrid System that they wish to designate in an international application, or subsequently, thereby enabling them to avoid provisional refusals and to prepare adequate simultaneous limitations in the international application, or in the subsequent designation.
- The MGS is available to the public, free of charge, at <https://webaccess.wipo.int/mgs/>.

This project is funded by
the European Union

Member Profiles Database

- Online tool that provides access to information concerning the laws and practices of the trademark Offices of Contracting Parties.
- It helps applicants to understand the rules and procedures in effect in each of the target markets of interest, including time limits to respond to a refusal or opposition, to request a review, or to file an appeal.
- It also assists applicants to comply with the trademark requirements in the markets of interest and understand the procedures for filing an international application through the Office of origin.
- The Members Profiles Database is available to the public, free of charge, at <https://www.wipo.int/madrid/memberprofiles/selectmember>.

This project is funded by
the European Union

Madrid Portfolio Manager

- Online service that allows holders of international registrations and their representatives to access their international trademark portfolios.
- Trademark holders have a user account which allows them to access the International Register online and view all transactions occurring on their international registrations, in real time.
- The service also offers the possibility for the trademark holder to manage actions pertaining to the protection of their own international registration(s), such as changes in name and/or address of the holder, presentations of subsequent designation, renewals and payments of fees.
- Madrid Portfolio Manager is available to trademark holders and their representatives, free of charge, at WIPO IP Portal.

This project is funded by
the European Union

Online Renewal/Subsequent Designation /Payment

- It is possible to renew an international registration online in the WIPO IP Portal. The payment of renewal fees may be made by credit card or through a WIPO current account.
- It is possible to expand the geographical scope of an international registration online.
- It is possible to pay fees owed with respect to international applications or registrations, as notified in WIPO irregularity letters or any other WIPO communication indicating the amount of the fees due in the relevant time limit. These payments may be made by credit card or through a WIPO current account.

This project is funded by
the European Union

Annual, Monthly and “In Progress” Statistics

- The International Bureau publishes on its website, for each calendar year, a statistical report summarizing activity under the Protocol during that year.
- Furthermore, it also publishes statistics featuring international applications, international registrations, subsequent designations, refusals and renewals, among others, in a dynamic form on an annual, monthly and “in progress” basis.
- The statistical information may be selected by Office of origin, Office of the Contracting Party of the holder or by designated Contracting Party. Statistics are available at <https://www.wipo.int/madrid/statistics/?lang=en>.

This project is funded by
the European Union

WIPO TOOLS AND ONLINE SERVICES ASSISTING IN THE FILING OF APPLICATIONS AND MANAGEMENT OF INTERNATIONAL REGISTRATIONS OF DESIGNS

- There are a number of useful customized tools designed by WIPO to assist the industrial designs applicants during each stage of their design's lifecycle.
- When using the E-filing interface to file an international application, users will be automatically alerted of the declarations or specific requirements set by a given designated Contracting Party.

This project is funded by
the European Union

Guidance on Preparing and Providing Reproductions in Order to Forestall Possible Refusals on the Ground of Insufficient Disclosure of an Industrial Design by Examining Offices

- The main problem with the Hague System is that there is no uniform drawings standard between the member states/organisations.
- Each country still has different substantive drawing requirements and different drawing sets may be needed depending on which countries are designated.
- This information tool contains guidance to prepare reproductions of the design in view of the designation of certain Contracting Parties.
- Available at the following link

https://www.wipo.int/export/sites/www/hague/en/how_to/pdf/guidance.pdf)

This project is funded by
the European Union

Available sources of information for anyone in need of information about the contents of the International Register, or about registered designs worldwide

- While WIPO does not check international applications for novelty of design, this is an essential requirement when seeking design protection.
- Designated contracting parties may issue a refusal based on lack of novelty.
- Available sources of information :
- **International Designs Bulletin**
- **Global Design Database**
- **Hague Express Database**
